Acetyl Hexapeptide-8 (Argireline)
QUICK GUIDE

Topical · grade C ♥

WHAT IS IT?

Acetyl Hexapeptide-8 (Argireline): topical SNAP-25-mimicking "Botox-like" cosmetic peptide. Small studies: ~30% wrinkle-depth reduction in 10 women over 30 days (10% solution); later small trials, some unblinded. Whether it penetrates skin is doubtful; part of the effect may be hydration.

Strongest evidence: C · Human observational

HOW IT'S TAKEN

Raw powder mixed into ~2 oz serum or cream

1 application = a thin layer

Small studies: ~30% wrinkle-depth reduction in 10 women over 30 days (10% solution); later small trials, some unblinded

C · Human observational

DOSING PROTOCOL

Catalog: 2 applications (grade E)

WEEK	DOSE (Apply as a serum after cleansing (after vitamin C), twice daily)
Week 1 onward	2 application
