Lemon Bottle

QUICK GUIDE

Cosmetic 'fat dissolver' regulators warn against ♥

WHAT IS LEMON BOTTLE?

Lemon Bottle is a cosmetic solution, mainly bromelain, lecithin and riboflavin, that's injected into fat with claims it dissolves it. No efficacy has been shown. Swiss and Finnish regulators warned against it, and Swiss lab tests found products that didn't match their labels. The approved option for under-chin fat is Kybella.

Strongest evidence: E · Community / vendor

PREPARATION

Pre-made solution: no mixing.

1. Swab the vial top with an alcohol pad.
2. Draw the dose straight from the vial.
3. Refrigerate; follow the vial label.

DOSING PROTOCOL

OPTION	DOSE (Weekly sessions × 3–5)	UNITS (U-100 SYRINGE)
Dose option	1 mL	100 units
Dose option	1.5 mL	150 units split in 2
Dose option	2 mL	200 units split in 2

POTENTIAL BENEFITS

- **Warnings:** Swissmedic and Fimea/Tukes warned against it (2024). C · Human observational
- **Contents:** Some samples contained none of the listed ingredients. C · Human observational
- **Approved option:** Kybella: FDA-approved for under-chin fat only. A · Approved use

POTENTIAL SIDE EFFECTS

- Severe bruising, swelling
- Infections, abscesses
- Necrosis (reported)

The catalog says it contains deoxycholic acid. The packaging lists bromelain, lecithin and riboflavin, and a clinician source says there's no deoxycholic acid.

Regulators classify it as a cosmetic (UK) or warn against injecting it (Switzerland, Finland), yet the catalog gives an injection protocol.

For subcutaneous injection

Refrigerate; follow the vial label.
