Pinealon 20mg

QUICK GUIDE

Russian bioregulator tripeptide, preclinical

WHAT IS PINEALON?

Pinealon is a three-amino-acid 'bioregulator' from Khavinson's lab in Russia, marketed for brain protection and sleep. The evidence is cell-culture work plus one uncontrolled 32-person report from the same lab.

Strongest evidence: D · Animal / lab

RECONSTITUTION

Add 2 mL bacteriostatic water to the 20 mg vial.

This yields 10 mg/mL.

1. Swab both vial tops with an alcohol pad.
2. Draw 2 mL of water and inject it slowly down the vial wall.
3. Roll gently until dissolved; don't shake.
4. Label and refrigerate.

DOSING PROTOCOL

Catalog: 2 mg daily for 10 days (grade E)

WEEK	DOSE (Daily for 10-day courses)	UNITS (U-100 SYRINGE)
Week 1	2 mg	20 units

The cycle setting gives 10 days on, then about 4 months off.

Cycle: catalog: 10-day courses, 2–3 times a year.

POTENTIAL BENEFITS

- **Cell studies:** Less oxidative damage in cultured neural cells. D · Animal / lab
- **Humans:** One uncontrolled cohort (source not found). C · Human observational

POTENTIAL SIDE EFFECTS

- No controlled data
- Catalog: fatigue or overstimulation if mistimed

Unit math: every unit value the catalog prints matches (10 mg/mL).

Treating lab claims as established

For subcutaneous injection

Refrigerate after mixing. Catalog: use within 60 days.

Evidence grade D: Animal / lab

For educational use only.
