VIP 10mg
QUICK GUIDE

Vasodilating neuropeptide: approved for ED abroad ♥

WHAT IS VIP?

VIP is a natural neuropeptide that relaxes blood vessels and airways and calms inflammation. Its synthetic version, aviptadil, is approved in the UK with phentolamine as an erectile-dysfunction injection. IV aviptadil failed in COVID trials, and daily under-the-skin use has no data.

Strongest evidence: A · Approved use

RECONSTITUTION

Add 2.5 mL bacteriostatic water to the 10 mg vial.

This yields 4 mg/mL.

1. Swab both vial tops with an alcohol pad.
2. Draw 2.5 mL of water and inject it slowly down the vial wall.
3. Roll gently until dissolved; don't shake.
4. Label and refrigerate.

DOSING PROTOCOL

Catalog 8-week ladder, Mon–Fri (grade E)

WEEK	DOSE (Once daily, 5 days a week)	UNITS (U-100 SYRINGE)
Week 1	100 mcg	2.5 units
Weeks 2–3	150 mcg	3.8 units
Weeks 4–8	200 mcg	5 units

Cycle: catalog: 8 weeks on, 2–4 weeks off (or 3 months on, 1 off).

POTENTIAL BENEFITS

- **ED (abroad):** Invicorp: aviptadil + phentolamine, UK 2015. A · Approved use
- **COVID trials:** Primary endpoint missed; NIH trial stopped for futility. B · Human trials
- **SC use:** No human data. N/E · Not enough evidence

POTENTIAL SIDE EFFECTS

- Flushing, low blood pressure (vasodilation)
- Diarrhea
- No SC human data

Vial size isn't stated; 10 mg is implied by the unit math.

100 mcg = 2.5 units and 150 mcg = 3.75 units; the catalog prints 3 and 4 (rounding). Other values match.

For subcutaneous injection

Refrigerate after mixing. Catalog: use within 60 days.

Evidence grade A: Approved use
